

# Information Security, Cybersecurity and Privacy Protection

## ISO/IEC 27001:2022

## **Purpose of ISO/IEC 27001:2022**

The purpose of this standard is to help organisations to establish and maintain an Information Security, Cybersecurity and Privacy Protection Management System; which is a set of interrelated elements that organisations use to manage and control Information Security, Cybersecurity and Privacy Protection risks. These elements include all of the policies, procedures, processes, plans, practices, roles, responsibilities, resources, and structures that are used to manage security risks and to protect information.

The adoption of an Information Security Management System (ISMS) preserves the confidentiality, integrity and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed.

The Information Security, Cybersecurity and Privacy Protection Management System focuses on preventing the confidentiality, integrity and availability of information by applying a risk management process and it gives confidence to interested parties that risks are adequately managed. This helps support the organisations strategic direction and performance.

## **Benefits of ISO/IEC 27001:2022**

### Protection of Data
